RELEVANT EXPERIENCE

Augmented Reality Training App for EduTechnologic

Columbus, OH

Software development (iOS application)

Jan, 2015 – May 2015

- Built an application that can make use of the three types of learning, auditory, visual and kinesthetic to provide an effective learning tool. The application make use of augmented reality, videos and text content with a concise user experience. [Demo](https://youtu.be/b_gESGQb76w) (https://youtu.be/b_gESGQb76w)
- Created all the augmented reality functionality using C# and JavaScript with Metaio SDK.
- Worked with the team to create a user friendly iOS app interface.
- Pull all the information from online database to ensure the content can be modified without updating the code.
